**Laser Guided
12 Lead EKG**

~~for the advanced~~
paramedic

**...with an introduction
to etCO₂ waveform
capnography**

GEM-EMI presents a new 12 Lead EKG curriculum specially designed for paramedics and pre-hospital nurses. The intent of this class is to provide you with an understanding of the acute and clinically significant 12 Lead EKG findings most often seen in the field.

This very interactive course will prepare you to become comfortable with or enhance your current knowledge of 12 Lead EKG technology – the standard of care in today's pre-hospital patient assessment of suspected cardiac compromise.

If you are new to 12 Lead EKG's or an old pro, this lively and informative course which makes use of extensive real life examples is for you.

Objectives:

- ♦ Cardiovascular A&P refresher
- ♦ How the carried by Medics medications affect the body and the heart.
- ♦ Pathophysiology of Acute Coronary Syndrome
- ♦ 12 EKG Interpretation and tips and tricks from pros all over the world.

- ♦ See why a simple multi-lead EKG can miss significant cardiac events.
- ♦ See how being versed in 12 Lead EKG technology will help your patient and your career.
- ♦ Walk away with the knowledge to know when it is not safe to just “pop that Nitro”.
- ♦ Learn how to identify which part of the heart is likely involved in the MI and then have the confidence to say, “I’d suggest an MI Alert”.
- ♦ Learn to tell which bundle branch is likely blocked in less than 5 seconds—Determine axis deviation in record time.
- ♦ Learn the “Five 2’s of Trouble” and many other tips & tricks.

No book is required for this course and everything you need will be supplied that day.

Class size will be limited, so please register quickly.
